## AUTOMATIC SELF-CLEANING FILTERS

**Klindex** has developed the new line of SUPERVAK dust collectors, specially designed to handle huge quantity of dust powders without any interruption for the filter blinding. Thanks to the **ASC PATENT (Automatic Self Cleaning Filters)** the new vacuums allow operators to continuously vacuum also the finest powder without filter troubles. The new dust collectors **SUPERVAK series ASC** are the only vacuums in the world that, thanks to a "timer connected to the **VIBRATION** and **CONTRA BLOWING** patented system" clean the filter at a definite time, automatically, allowing you to work continuously without stopping. In the series **SC (Self Cleaning Filter)** operating by a simple lever it is possible to automatically clean the filters without removing them.

### Main features:

- Patented system to shake and blow the filter at the same time
- Continuous cleaning: vacuum is always working even during filter cleaning
- Electronic Timer (for ASC models) to control the self cleaning: cleaning cycles can be modified according to the job and to the vacuum dust
- Big filter surface thanks to the big cartridge filters
- Easy removal of the collection tank with the chance (optional) to use normal plastic bags
- Longo-Pac System (standard on series BAG LINE)
- Robust and long lasting aluminium coated cartridge filters, so that the dust doesn't adhere but slips away
- Anti-static filters to avoid electrostatic shocks (optional)
- Height-reducing telescopic frame which makes transportation much easier even in normal Vans (models KY200, KY250).

## Supervak KY250 Dust Extractors

**SUPERVAK KY250** is the largest of SUPERVAK series vacuum cleaners. Equipped with 2 independent Motors 4 Kw each for a total power of 8 Kw or Hp 11 and a large filtering box, it is the ideal apparatus to quickly vacuum large quantities of dust in industrial special applications. It is recommended to connect it to the large Sanders as EXPANDER 1000 or to large scarifiers, grinders and shot blasting machines. Available in ASC or SC version.

### Equipped with various safety systems:

- A vacuum imitator valve ensures the cooling of the engines even in continuative and burdensome use
- A pressure indicator allows you to monitor any anomalies or clogging of filters
- A Thermal disrupts the operation of the engines in case of overheating
- Two secondary filters protect the engine in case of accidental passage of dust through the main filters

Model	Volt	max Power W	Depress. max mm H <sub>2</sub> O	Filter Surfaces cm <sup>2</sup>	Air flow max Lt/min	Noise level dB(A)	Tank capacity Lt	Valve mm H <sub>2</sub> O
KY250 8kw	3-phase	8000	2753	96600	6033	74	70 or 100	3150

## Supervak KY200 Dust Extractors

**SUPERVAK KY200** is the ideal dust collector for all those who have to vacuum big quantities of dust and who have to carry the machine from a place to another. It has been specifically designed to be connected to floor sanders, to grinders, to scarifiers or to shot blasting machines.

### It is equipped with a telescopic chase which:

- Can be used, while working, in the "high position" greatly amplifying the "cyclone effect" and the filtering power. Higher is the filter chamber, more easily is the separation of dust from the air, resulting in less clogging of filters
- Can be used, during transport, in the "low" position in order to reduce its dimensions and to be easily loaded even in small vans

Available in version ASC or SC. The ASC series is equipped with a control unit with 4 automatic self-cleaning programs that greatly increases the performance of the vacuum cleaner. A secondary filter protects the engine in case of accidental passage of dust through the main filters.

Model	Volt	max Power W	Depress. max mm H <sub>2</sub> O	Filter Surfaces cm <sup>2</sup>	Air flow max Lt/min	Noise level dB(A)	Tank capacity Lt	Valve mm H <sub>2</sub> O
KY 200	1-phase	2200	3100	32000	5800	74	10	2300
KY200 3T	3-phase	3000	3300	32000	5800	74	10	2750
KY200 4T	3-phase	4000	3600	32000	5800	74	10	3150

## Supervak KY90 Dust Extractors

**SUPERVAK KY90** is a powerful compact vacuum cleaner to vacuum large quantities of dust as: plaster, cement, flour, scobs, sawdust, dust materials from ceramic industry as well as dust produced by sanders, grinders, core drills etc. Available both in ASC version "Automatic Self Cleaning Filter" and in SC version "Self Cleaning Filter". Thanks to ASC and SC patent it allows you to work continuously without having to stop to dismantle and clean the filters (which is an operation that everybody always postpones and nobody would want to do because dusty and annoying).

### Main features:

- ASC or SC system: Automatic and/or Self Cleaning Filter
- 3 cartridge filters
- Collection stem easily removable
- Possibility to insert a normal plastic bag (optional)
- Secondary filter to protect the engine in case of accidental passage of dust through the main filters
- Available with mono phase or 3-phase engines
- Hepa filter available on request

Model	Volt	max Power W	Depress. max mmH <sub>2</sub> O	Filter Surfaces cm <sup>2</sup>	Air flow max Lt/min	Noise level dB(A)	Tank capacity Lt	Valve mm H <sub>2</sub> O
KY 90	1-phase	2200	3000	32000	5800	74	70	2300
KY 90 T3	3-phase	3000	3300	32000	5800	70	70	2750
KY 90 T4	3-phase	4000	3600	32000	5800	74	70	3150

## Supervak KY77 Dust Extractors

**SUPERVAK KY77** is the ideal vacuum cleaner to connect to polishers of medium size. It is Ideal for all works in which you have to vacuum also fine dust in any environment without having to perform the "not pleasant operation of disassembling and cleaning the filters manually, as in conventional vacuum cleaners.

### Main features:

- SC ("Self Cleaning Filter")
- Longo-Pac system
- Three powerful independent and detachable motors which can be used as small powerful vacuum cleaners and one as "a little air compressor blower" (optional)
- Secondary filter to protect the engine in case of accidental passage of dust through the main filters
- Available with cartridge filters (standard) or fabric filter
- Hepa filter available on request (optional)
- Anti tipping structure. Easy to carry

Model	Volt	max Power W	Depress. max mm H <sub>2</sub> O	Filter Surfaces cm <sup>2</sup>	Air flow max m <sup>3</sup> /h	Noise level dB(A)	Tank capacity
KY77 Bistadio	1-phase	3800	2500	30000	640	74	Long Pack
KY77 Tristadio	1-phase	4200	2600	30000	690	74	Long Pack

## Supervak KY76 Dust Extractors

**SUPERVAK KY76** is the ideal vacuum cleaner to connect to polishers of small and medium size. It is Ideal for all works in which you have to vacuum also fine dust in any environment without having to perform the "not pleasant operation of disassembling and cleaning the filters manually", as in conventional vacuum cleaners. Excellent to aspire wood dust during the sanding operation with TIMBA.

### Main features:

- SC system ("Self Cleaning Filter")
- Longo-Pac system
- Two powerful independent and detachable motors which can be used as small powerful vacuum cleaners and one as "a little air compressor blower" (optional)
- Secondary filter to protect the engine in case of accidental passage of dust through the main filters
- Available with cartridge filters (standard) or fabric filter
- Hepa filter available on request (optional)
- Anti tipping structure. Easy to carry

Model	Volt	max Power W	Depress. max mm H <sub>2</sub> O	Filter Surfaces cm <sup>2</sup>	Air flow max m <sup>3</sup> /h	Noise level dB(A)	Tank capacity
KY76 Bistadio	1-phase	2600	2500	20000	430	74	Long Pack
KY76 Tristadio	1-phase	3200	2500	20000	520	74	Long Pack

## Supervak KY75 Dust Extractors

**SUPERVAK KY75** is the smallest of the SUPERVAK BAG LINE series. It is the ideal vacuum cleaner if connected to small polishers. It is Ideal for all works in which you have to vacuum also fine dust in any environment without having to perform the "not pleasant operation of disassembling and cleaning the filters manually", as in conventional vacuum cleaners. Excellent to aspire wood dust during the sanding operation with TIMBA.

### Main features:

- SC system ("Self Cleaning Filter")
- Powerful and removable "blower" engine usable as a tiny powerful vacuum cleaner or even as a "small air compressor blower"
- Longo-Pac system
- Secondary filter to protect the engine in case of accidental passage of dust through the main filters
- Available with cartridge filters (standard) or fabric filter
- Hepa filter available on request (optional)
- Anti tipping structure. Easy to carry

Model	Volt	max Power W	Depress. max mmH <sub>2</sub> O	Filter Surfaces cm <sup>2</sup>	Air flow max m <sup>3</sup> /h	Noise level dB(A)	Tank capacity
KY75 Bistadio	1-phase	1400	2500	14000	215	74	Long Pack
KY75 Tristadio	1-phase	1600	2500	14000	290	74	Long Pack

## Supervak CYCLON

**SUPERVAK KY75 KIT CYCLON**, to connect to any SUPERVAK model, useful to vacuum large quantities of dust in industrial applications. After circulating through the inner filter the dust is deposited into a robust plastic bag, which can be used for both removal and storage of the debris. The detachable trolley is mainly used for removing filled bags.

### ACCESSORIES ø50mm - SUPERVAK KY 80/90/100/200/250

07435KYKIT	Complete ø50 mm kit accessories Supervak of art.: 07434MT5 + R7243 + R7246 + R7259 + R7260 + R0519K
